## **SMALLPOX VACCINE MADNESS**

NOVEMBER 19. Gary Cramer has assembled some vital facts about the history of smallpox vaccination.

"...compulsory smallpox vaccination campaigns in the late 19th and early 20th centuries...played a major role in decimating the populations of Japan (48,000 deaths), England and Wales (44,840 deaths, after 97 percent of the population had been vaccinated), Scotland, Ireland, Sweden, Switzerland, Holland, Italy, India (3 million [deaths]--all vaccinated), Australia, Germany (124,000 deaths), Prussia (69,000 deaths---all re-vaccinated), and the Philippines."

"In many nations, mortalities from smallpox hadn't begun to decline until the citizenry revolted against compulsory smallpox vaccination laws. For example, the town of Leicester from 1878 to 1898 stood in stark contrast to the rest of England, where thousands were dying from the aggressive half-century-old government mandatory immunization campaigns."

"By 1907, the Vaccination Acts of England were repealed...By 1919, England and Wales had become one of the least vaccinated countries, and had only 28 deaths from smallpox, out of a population of 37.8 million people. By contrast, during that same year, out of a population of 10 million--all triply vaccinated over the prior 6 years--the Philippine Islands registered 47,368 deaths from smallpox. The epidemic came after a the culmination of a ruthless 15-year compulsory vaccination campaign by the US...In a speech condemning the smallpox vaccine reprinted in the Congressional Record of 12/21/37, William Howard Hay, MD, said, '...the Philippines suffered the worst attack of smallpox, the worst epidemic three times over, that had ever occurred in the history of the islands, and it was almost three times as fatal. The death rate ran as high as 60 percent in certain areas, where formerly it had been 10 and 15 percent.'"

This is called hidden history.

More and more people, these days, are beginning to realize that the world of hidden history is larger than the world of popular history.

Two of a number of US government agencies---the Library of Congress and the CIA--are devoted to, and obsessed about, documenting history. But only the "right kind," obviously.

We are under no such constraints. Lucky for us, because we are the target of the current vaccine madness.
