

Dear Senator Bill Nelson,

I am a researcher, speaker, an active member of the political machine of my profession and an advocate for "informed choice" on issues of mandated healthcare issues. I'm sure you are aware of the following letter by Dr. Mercola, entitled, "Save Your Vaccination Rights: Tell Your Senators to Vote NO to Homeland Security Bill!" so I will not take any of your time rehashing the facts. I will say however that politics has no place in the medical arena except to enhance the agendas of pharmaceutical lobbies who are financed and orchestrated by corporations, with non competitive agreements arranged by subsidiaries of "IG" owned corporations.

I am cutting to the chase and asking you to vote NO to the absurd addition (title 111, section 304 of HR 5710) because THIS IS NOT IN THE BEST INTEREST OF THE PEOPLE OF OURS' OR ANY STATE; and with all due respect to you and your fellow elected representatives of our state, this political "trickery" will serve only to further erode the tenants of personal freedom and justice.

I know several babies who have died and dozens who have been irreparably damaged because of what is stated in Dr. Mercola's letter. Their families have virtually no recourse as it is now and to spare you the details... how would you vote if a member of your family faces this crisis. I urge you to vote for what you know is right, not what is expedient. Politics has no place in medicine.

Thank you for your service,
Sal Martingano, D.C.
