

VACCINATIONS ARE NOT IMMUNIZATIONS

Vaccinations ARE NOT IMMUNIZATIONS! There is a difference. When you learn about the financial motivations and politics behind these shots, you will understand why it has been such a difficult battle for those who question it.

Just some facts from the seminar:

1. The USA is #22 on the infant mortality list regardless of all the MEDICAL ADVANCES we have.
2. 4 well known inventors of 4 major vaccines, after being established in their careers and making millions of dollars over years and years have gone back and admitted that they DO NOT WORK and they are causing more HARM than HELP.
3. There 15 doctors on the 4 year board specially set up to approve or disapprove vaccines. They are employed by the pharmaceutical companies before AND AFTER their term and they openly admit financial ties to stocks related to these companies. There is NO CONFLICT OF INTEREST b/c they are given special yearly waivers that exempt them.
4. There is NO research on combination vaccines and NO restriction on the number of vaccines given in one visit. For example, foster children with no forwarding of records are sometimes given ALL 40 vaccines in one sitting!
5. A medical study proved that 5 consecutive flu shots given in a particular 5 year period will increase a persons chance of Alzheimer's Disease by 10% due to the aluminum.
6. There was a time period where Japan did NO VACCINATIONS until the children were 2 years old, and during this time there were NO CASES OF SIDS DEATH. They have since switched back to vaccinating newborns again anyway.

So these were just some things that impressed me and it goes much deeper than what I just reviewed. I can honestly say I believe in my heart that vaccines are the cause of SIDS, the cause of Autism, the cause of many gastrointestinal problems, and the precursor to many childhood problems that would not normally occur.
